

Software That Works The Way You Do

bisTrack is business software developed specifically for building industry suppliers: multiple-location building materials distributors and dealers, including those with remanufacturing and/or extensive contractor lumberyards. The software facilitates everything a distributor and dealer needs to do to buy and sell product. The benefits of using bisTrack include:

- Streamlined workflow, with itemized task reminders and automated paperwork to speed transactions and reduce errors, from quotation to order to delivery.
- Better customer service, with faster counter sales, up-to-date inventory information and customer histories at a sales person’s fingertips.
- Faster inventory turnover, from selling on-order and WIP inventory.
- Integrated operations, coordinating sales and inventory at multiple locations.
- Informed decisions, with real-time margin calculations displayed on the screen during negotiation, and extensive management information reporting.

Full-featured software to manage your buying and selling

bisTrack supports a wide variety of product types (including hardwood and softwood lumber), units of measure, all sales order types, payment terms, and delivery methods. Here are just some of the key functions that are automated and streamlined with bisTrack:

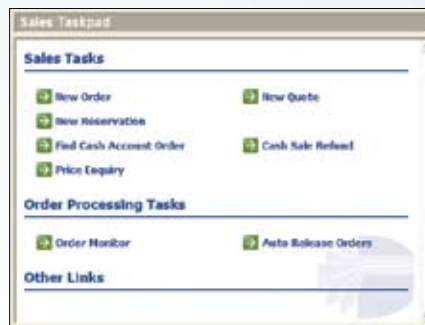

Quotation and reservations
 On-screen margin calculation
 Inventory management
 Comprehensive pricing rules

POS with scanning devices
 Full purchase ordering
 Counter & back office
 sales order processing

Value-added processes
 Extensive reporting, including
 inventory turns & GMROI
 Picking and delivery

Designed specifically for building materials distributors & dealers

We designed bisTrack to simplify the jobs your staff do every day. Depending on their user profile, your staff’s “home” screens will tell them the status of their work, remind them of outstanding tasks, and give them shortcuts to the screens they use most frequently. bisTrack’s Dashboards and Taskpads help your staff quickly identify their tasks and jobs and the intuitive Web-style screens link them directly to the work to be done.

Taskpads provide shortcuts to all the functions typically performed by the user. There are taskpads for Sales, Purchasing, Stock, Invoicing and Routines.

Dashboards show an overview of operations, a list of tasks to be performed and messages of interest to the user.

One supplier. One integrated system. Only Progressive Solutions.

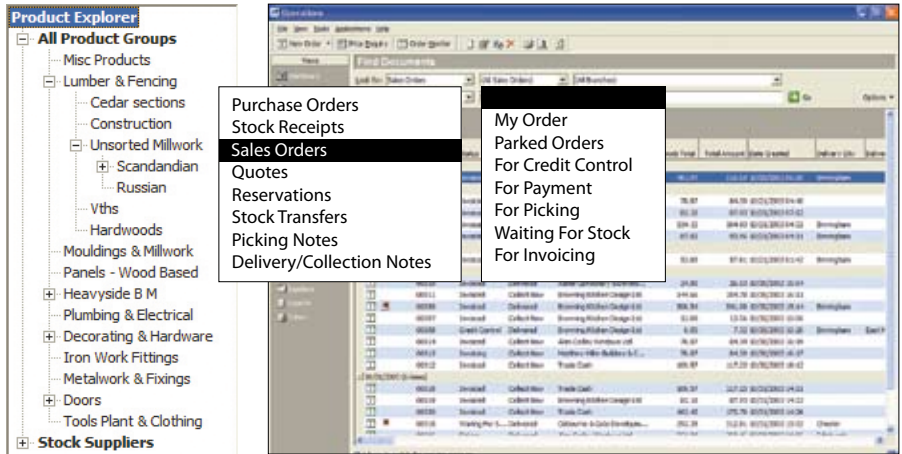

Simple to use at the counter or in the back office

Best of all, it's easy to use. bisTrack's Windows®-based screens are intuitive to learn and quick when processing transactions. Finding what you need is incredibly easy, and screens can be set up so that each user gets the most from the screens they use most often.

Powerful reporting and interoperability

The system's strength lies in its powerful and easy-to-use management tools. bisTrack offers numerous choices to analyze your data, including 'slicing and dicing' data on the screen with OLAP cubes, viewing standard reports created in Crystal Reports, or exporting the data to excel dashboards or smart views and exporting data to Microsoft Excel®.

Searches are easy and flexible using Explorers, or partial word and synonym searches.

Finding documents, customers and products is speedy with pull-down menus and matching criterion. You can add fields and re-arrange screens to match your unique business needs.

Technology and using customized architecture supports multiple locations

Scalability is designed into bisTrack's architecture, facilitating hundreds of users at multiple locations. Microsoft® development tools and state-of-the-art technologies allow us to create user-friendly and powerful features of a true Windows application. You get the benefits of a fast learning curve, scalability, reduced operating and support costs.

"If you want to take advantage of today's technology to make your processes better, bisTrack is the answer. All the other products on the market are trying to catch up on the Windows interface that bisTrack has. bisTrack is a product for now and the future."

—Joost Douwes, Vice-President and General Manager, Chinook Lumber

"We selected bisTrack because of the completeness of the package; also because it's Microsoft based and the backbone is secure. The future looked brighter with bisTrack. We're excited and we're only using maybe 60% of what is truly in there."

—Ken Guisinger, General Manager, Canby Builders Supply

Progressive Solutions has helped lumber and building material dealers and distributors from around the world improve their processes and their bottom line.
