

Fiber Track

Integrated Log Yard Management System

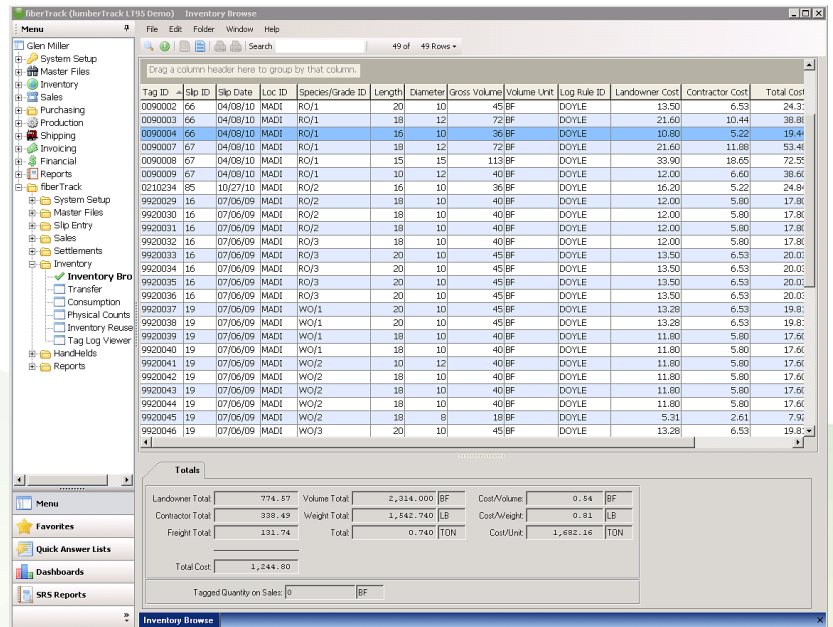

Fiber Track is an integral part of Progressive Solutions' wood products supply chain management solution. Sold in conjunction with lumberTrack, Fiber Track expertly manages log procurement and settlement to pass accurate log costing and inventory data seamlessly into lumberTrack.

Accurate costing ensures profitable sales

Wood products suppliers — whether you are a supplier of higher value specialty products or market-sensitive commodity products — you will negotiate more profitably when you know the actual cost of the products you have in production and inventory.

Fiber Track extends the reach of lumberTrack into the log yard, capturing the cost, grade and quality of each log. Viewing this information within Fiber Track and lumberTrack allows your mill operations to make more profitable decisions:

- Optimal log harvesting, selection and production planning.
- Market-driven pricing strategies that compensate for changing raw log costs.
- Accurate finished product costing, available prior to setting the final sales price.

Tag ID	Slip ID	Slp Date	Loc ID	Species/Grade ID	Length	Diameter	Gross Volume	Volume Unit	Log Rule ID	Landowner Cost	Contractor Cost	Total Cost

Log Inventory Browse by Detail

Streamlines log yard operations

Fiber Track runs on Handheld Data Collection devices to automate the key functions of the log yard, saving time and reducing data entry errors:

- Scale both tag and untagged logs, in the yard and in the field, keying in length, diameter, species, grade and log rule according to rules that you set.
- Calculate a slip value based on the pricing table you set, and record on scale slips.
- Interface with weigh scales to capture load weight, and record weights on weigh slips.
- Generate settlement slips for vendor, contractor and freight carrier costs of gatewood and contract purchases.

Fiber Track ...continued.

Comprehensive inventory management

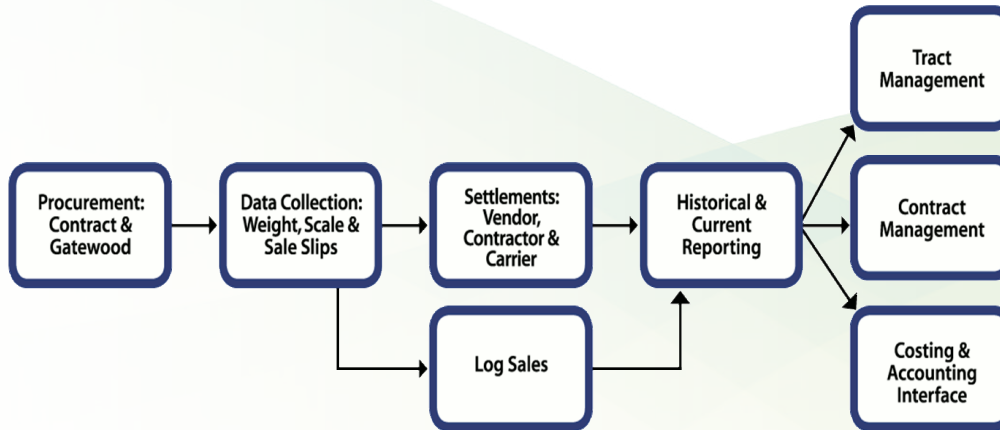

Fiber Track helps you effectively manage log yard inventory to improve efficiency and provide instant knowledge of inventory on-hand.

- Track all inventory movement, whether for consumption, internal transfer or sale.
- Document point of origin for logs transferred from other facilities.
- Calculate total cost for each log, adding carrier and other costs added throughout your process, for accurate costing in your financial system.
- Perform physical counts quickly and accurately.

Better supply chain management

Fiber Track's reporting capabilities provide insight and data to strengthen business planning.

- Communicate more effectively with your supply chain partners by having detailed knowledge of their vendor, contractor, carrier and customer histories.
- Improve your overall responsive-ness through faster and more efficient management of timber and vendor contracts.

Progressive Solutions has helped wood products and building material companies from around the world improve their processes and their bottom line.
