

Dashboard Module

lumberTrack's Dashboard module helps you keep a finger on the pulse of your business. See critical business information at a glance in a graphical view configured the way you like to see it.

- **Quickly view performance metrics important to you.** Each lumberTrack user can display the information important to their job, and set up their Dashboard for their preferences and needs.
- **Get the 'big picture' any time you want.** Quickly view sales orders, production and inventory plans, costs and margins with real-time information directly from lumberTrack or from the data warehouses.
- **Link multiple charts.** lumberTrack allows you to place multiple charts on a dashboard simultaneously with the data on one chart being linked and driven from another (e.g. chart with top customers controlling a second chart that displays the sales breakdown for each top customer).

Dashboard Module ...continued.

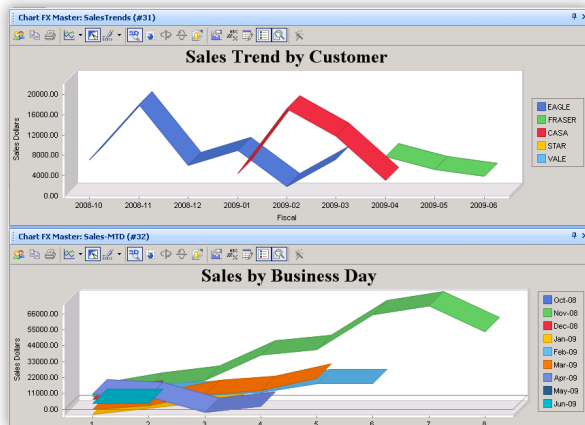

View instant reports on key business information

View real-time business information from your desktop any time you want. You decide what information is important to you and how you want to display it.

Trouble-shoot and locate problems

The dashboards can support 'drill-through' functionality that allows the user to click on an item on a graph or chart and 'drill' back to the originating transaction within the lumberTrack database. Dashboards can identify exceptions as they occur and allow you to access the source transactions and address the issues quickly.

Progressive Solutions has helped wood products and building material companies from around the world improve their processes and their bottom line.
