

## lumberTrack Imaging: Scanned Document Management

lumberTrack Imaging™ is a comprehensive scanned document management system for lumberTrack and MS Dynamics GP with document storage, linking and retrieval capabilities.

### Improve staff responsiveness, efficiency and accuracy

Your staff will be more efficient and better informed with everything at their fingertips. Tasks are easier, so your staff is more accurate and consistent. Here's how:

- **Capture and track lumberTrack documents automatically.** Whether you fax, email or print out of lumberTrack.
- **Centralize and link related important documents.** Even signed and outside documents.
- **Retrieve documents quickly.** Find related documents for easy viewing, or to print, fax or email.
- **Reduce physical storage space and paperwork.** No more filing crumpled slips.

*Save time and improve responsiveness with lumberTrack Imaging. Attach and link scanned document images for quick retrieval within lumberTrack and MS Dynamics GP.*

### Arm your departments with powerful tools to improve workflow

With lumberTrack Imaging, your staff will be able to access relevant documents on their screen to respond promptly and accurately to requests, resolve issues faster, and improve customer satisfaction.

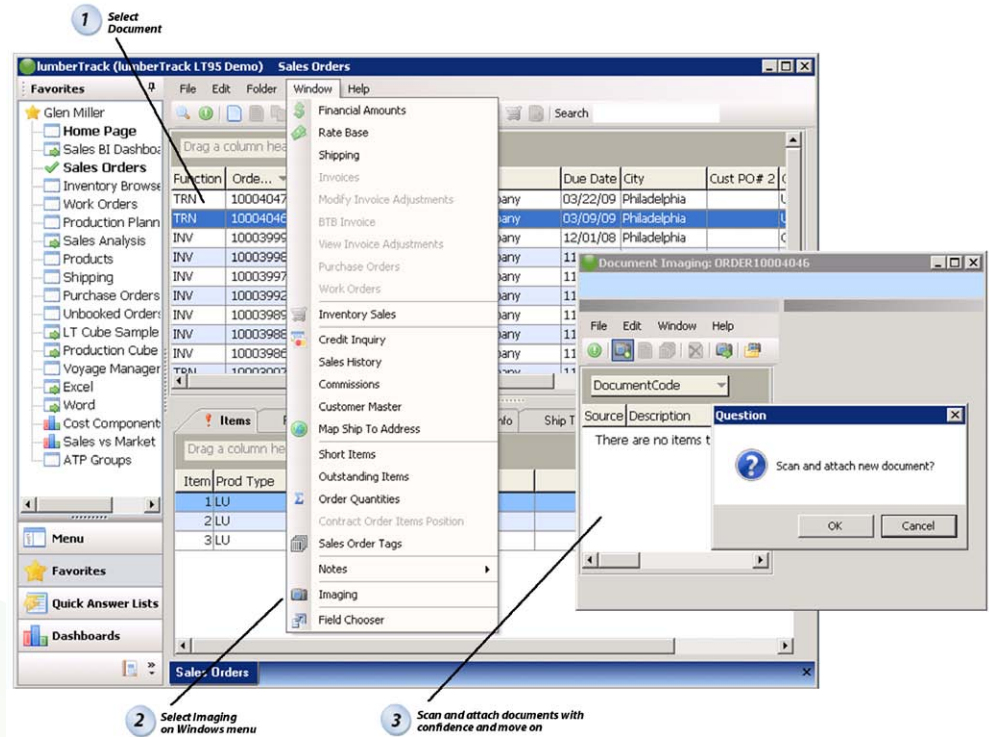

- **Sales.** Quickly track an order, from PO to delivery, all within lumberTrack.
- **Account/Vendor Management.** Scan and store key correspondence, linked to the relevant customer/vendor.
- **Work Order Management.** Scan and link customer drawings and plans to the relevant work order.
- **Shipping and Receiving.** Store photo images of delivered product. Scan signed delivery documents and link them to their order number.
- **Accounts Payable.** Store vendor invoices electronically to reduce physical storage and automatically link with POs.
- **Finance & Accounting.** Capture images within Microsoft Dynamics GP Notes for documents such as invoices, journal entry backup and external purchasing documents.

## lumberTrack Imaging...continued.

### Choice of document imaging solutions

lumberTrack Imaging accepts documents scanned by TWAIN scanners, and offers four imaging options:

- **Manual Scan.** Scan single images and edit the properties after the scan is complete.
- **Batch Scan.** Import scans from a folder created when importing from a printer or scanner.
- **Browse & Attach.** Browse your files and manually attach image files. These files do not need barcodes.
- **Automatic Document Capture.** Automatically capture and store images of lumberTrack documents for accurate communications records.

### Barcodes save time and link documents within lumberTrack

In all scan options, lumberTrack Imaging looks for a barcode in the scanned image, then links it to relevant documents within lumberTrack. Even outside documents can be barcoded and linked within lumberTrack.

Most common bar code fonts are supported. Two Microsoft® "3 and 9" (Code 39) barcode fonts are shipped with lumberTrack Imaging so creating barcoded documents and labels is easy and convenient.

**Progressive Solutions has helped wood products and building material companies from around the world improve their processes and their bottom line.**
