

## Message Center

lumberTrack's Message center helps you keep a finger on the pulse of your business. Critical business information is distributed to the individuals needing to deal with it and this information is available at a glance. You can be alerted and reminded of important messages, exceptions, commitments and appointments as this module is connected to both lumberTrack and the CRM module.

The maintenance of messages is done in a simple table where the user can specify what event(s) occurring at which location(s) should trigger either a message or an email to a specific individual.

### Be efficient, informed and responsive

lumberTrack's Message Center helps you and all your staff work at peak efficiency. Sales and customer service people will be more responsive and foster the customer loyalty that brings repeat business and increased sales. Operations people will be able to respond more rapidly to changing customer or company needs. Accounting staff will work in concert with other staff to manage accounts.

Progressive Solutions has helped wood products and building material companies from around the world improve their processes and their bottom line.
